PERSONAL PROFILE

I am a JavaScript developer, currently specializing in the React frontend library, with a focus on responsive design.

With a background in medicine, I bring discipline, commitment to continuous skill development, and the ability to adapt to diverse team environments. Also I have a good understanding of the medical domain.

I embarked on my web development journey in April 2023 and started my first project in September 2023. Since then, I have worked on various projects to improve my skills and knowledge in the field.

I am enthusiastic about joining a team where I can collaborate and benefit from learning and growth opportunities.
